Professional Summary

Experienced software engineer with over 6 years of expertise in full-stack development. Proficient in designing, coding, and deploying scalable web applications using modern technologies like ASP.NET, C#, Python, and cloud platforms (AWS, Azure). Passionate about building high-performance applications and streamlining development processes with CI/CD.

Knowledge Programming Languages C, C++, C#, Python, JavaScript, TypeScript, SQL, **Web Technologies** ASP.NET, HTML5, CSS3, React, Node.js, Angular, **Databases** SQL Server, MySQL, PostgreSQL, MongoDB, **Cloud & DevOps** AWS, Azure, Docker, Kubernetes, Jenkins, Terraform, **Version Control** Git, GitHub, Bitbucket, **Soft Skills** Leadership, Communication, Problem-Solving, Time Management.

Career History**Senior Software Engineer**

Tech Innovators LLC – Los Angeles, CA

August 2018 – Present

- Spearheaded the development of a cloud-based customer management system using ASP.NET Core and Azure, reducing client onboarding time by 35%.
- Led a team of 5 developers to design RESTful APIs, integrate third-party services, and deploy microservices-based architecture.
- Enhanced application performance by 40% through performance tuning and refactoring backend code.
- Implemented CI/CD pipelines using Jenkins and Docker, automating deployment to AWS and Azure.

Software Developer

Digital Solutions Corp. – San Francisco, CA

June 2016 – July 2018

- Designed and developed dynamic web applications with ASP.NET MVC, C#, and SQL Server for e-commerce and healthcare clients.
- Reduced page load times by 25% using front-end optimization techniques and improving database queries.
- Collaborated with UX designers to create intuitive and responsive UI components using HTML5, CSS3, and JavaScript.

- Automated regular tasks, saving over 15 developer hours per week by writing scripts in Python.
-

Academic Background

Master of Science in Computer Science

University of Southern California – Los Angeles, CA

2014 – 2016

- GPA: 3.9/4.0
- Relevant Coursework: Machine Learning, Distributed Systems, Software Engineering, Advanced Databases

Bachelor of Technology in Information Technology

University of California, Berkeley – Berkeley, CA

2010 – 2014

- GPA: 3.7/4.0
 - Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Networks
-

Projects

AI-Powered Resume Screening Tool

March 2023 – July 2023

- Developed a resume screening tool using Python and NLP libraries (spaCy, NLTK) to extract candidate information and rank resumes based on job criteria.
- Integrated the tool into an HR management system using a Flask API for seamless candidate data processing.
- Increased the efficiency of the hiring process by 50%, reducing the time to shortlist candidates.

E-commerce Platform Development

September 2021 – February 2022

- Built a full-stack e-commerce platform with ASP.NET Core and React, featuring product management, payment integration, and real-time order tracking.
 - Scaled the platform to support thousands of concurrent users using Azure cloud services.
-

Certifications

- AWS Certified Solutions Architect – Associate (2022)
- Microsoft Certified: Azure Developer Associate (2021)
- Scrum Master Certification (2020)

Languages

- English (Fluent)
- Spanish (Intermediate)

Awards & Honors

- Employee of the Year – Tech Innovators LLC (2021)
- Best Project Award – USC Computer Science Department (2016)

Volunteer Experience

Code for Good – Volunteer Software Developer

January 2020 – Present

- Developed web applications for non-profit organizations, improving their online presence and operational efficiency.
